

AND6 log (October 20-31, 2010)

Draft 1 (October 30, 2011). Status: Less than 70% of the recordings have been analyzed.

Participants: Geir Fredheim, Jan Alvestad, Ole Forr and Tore B Vik
Antennas: 800m (270 degrees), 800m (297 degr.), 800m (313 degr.)

Coloring: **Green** – station heard several times, **blue** – rare station, **black** – unspecified

Logging policy: Time of log is not included neither in internal nor external logs. There are several reasons, one is to let those who want to compete in RANKs be able to claim their DX listening is individual, another is to avoid what is essentially duplicate reception reports to stations within a short time span.
